

## Providing medical support on and off the pitch

Based at Stamford Bridge, Chelsea Football Club has the eighth largest ground in the Premier League with a capacity of 41,623. With a vision to provide its supporters, within hospitality and the stands, along with its players, with a safe and secure environment Chelsea Football Club began a working relationship with ERS Medical.

For a number of seasons ERS Medical has been providing medical events cover at the club. The service sees players and supporters covered by a highly specialist and bespoke service which was developed by ERS Medical to work in conjunction with its existing medical team.

### Exceeding requirements

To allow ERS Medical to ascertain the needs of the club a selection of its team with specialist knowledge in professional sport club medical cover visited the ground. A series of pre-season meetings took place allowing ERS Medical to work with the club's medical team to agree a pre-set number of protocols for working on the pitch and in the public eye.

ERS Medical also worked with the club to review the equipment used pitch side and provided additional training for the club's paramedics on its event sports team.

Due to the successful partnership with ERS Medical and the existing medical team the club has been impressed with the level of service provided. ERS Medical now covers all competitions at Chelsea Football Club including Champions League, Barclay's Premiership, Capital One Cup and FA Cup.

"ERS Medical provides a professional, consistent and highly reliable service for all the teams we run at Chelsea."

Dr David Porter  
Club Doctor, Chelsea Football Club

### Providing additional support

As an extension to the contract ERS Medical also supplies emergency medical services to the Chelsea Academy. Its crews are the first port of call when issues arise during matches or during training for both the Academy and the football club.

In order to provide a direct link to ERS Medical, Chelsea Football Club has a dedicated account and clinical manager acting as a regular point of contact for any service related queries. This is in addition to consistent senior paramedics who understand the intricacies of the club and provide an overview of service delivery during the events and matches.

### Driven by Patient Care
